

KHAN SAAB Coin – Whitepaper (Total Supply: 750 million — Planned Allocation)

-  Token Name: KHAN SAAB Coin
-  Symbol: KHAN
-  Founder: Captaan
-  Community: IKAmy
-  Blockchain: Binance Smart Chain (BEP-20)

Vision Statement

Inspired by the integrity and determination of Imran Khan, KHAN Coin is a people-first cryptocurrency designed for transparency, accessibility, and public empowerment. The project is dedicated to ordinary Pakistanis seeking fairness, honesty, and digital financial inclusion.

> “Like Imran Khan always said — truth takes time, but it always prevails. I don’t ask for your trust — I will earn it with truth, transparency, and time.”

💬 "KhanCoin is more than just a digital currency — it’s a movement for justice, transparency, and economic freedom..."

- 1  KHAN SAAB Coin — The Currency of Naya Pakistan 🇵🇰
- 2  Justice. Welfare. Freedom. Powered by KHAN Coin. 🙌
- 3  From the people, for the people — KHAN Coin. 🤝

KHAN Coin is a token built for transparency and growth, not just temporary hype. This project is designed with long-term sustainability and cross-chain potential from the start. We believe in fair distribution, visible locking, and future utility — all tracked openly for the public.

The project is led by Captaan — a digital-first builder focused on transparent crypto design for the public.

 Total Token Supply: 750,000,000 KHAN Coin

Allocation Type	Amount (KHAN Coin Tokens) Notes
-----------------	---------------------------------

Public Distribution	550,000,000	For community sales
Liquidity Pool	100,000,000	PancakeSwap / Exchange liquidity
Marketing / Giveaway	50,000,000	Contests, bonuses, promotions
Staking / Reserve	50,000,000	Locked supply / long-term reserve

Transparent Supply Statement

> "KHAN SAAB Coin has a total supply of 750 million."

While many early-stage projects do not clearly display their founder or reserve wallets, KHAN Coin takes a different approach — by openly showing all key wallets from day one, to build trust, transparency, and long-term credibility.

Unlike most early-stage tokens, KHAN Coin is committed to full transparency — all founder and locked wallets are publicly viewable from the start, ensuring trust with the community and investors alike.

How KHAN Coin Is Truly Different

Previous Pakistani coins struggled to deliver on transparency, fairness, or real-world utility. KHAN Coin is built to break that pattern with a bold, public-first model.

Here's how we're truly different:

Locked Supply With Proof

Our locked tokens are not hidden — they are verifiably locked, with clear public access to lock records.

No Hidden Founder Wallet Tricks

There is no private stash or secret founder wallet. Every token — public, locked, or allocated — has a declared, traceable purpose.

Pricing Designed for Real People

Past coins were overpriced or unreachable. KHAN Coin is launching at a price point that everyday Pakistanis can afford — and be proud to own.

Utility & Ecosystem Focused

This isn't just a hype token. We're building toward cross-chain bridges, wallet tools, and real-world digital access.

Public-First, Always

From referrals and giveaways to community tools, the entire structure of KHAN Coin is built for the public — not just early insiders.

How KHAN Coin Is Different (From Past Coins) 1 PKR = 1 KHAN Coin – Public-friendly price, affordable for everyone

No airdrop abuse – Only referral rewards, controlled giveaways

Transparent wallets – Fund, giveaway, and lock wallets clearly defined

KHAN Coins sold in multiple price phases – Starting from just 1 PKR, gradually increasing as demand grows

Community engagement – Weekly contests, referral bonuses, public involvement

DEX launch after funding – Liquidity added later to prevent early price crashes

Public-First Pricing Model

KHAN Coin will offer 1 KHAN Coin per 1 Pakistani Rupee — designed to support affordability in today's digital economy.

In today's world, even 1 rupee buys nothing — but KHAN Coin is giving you 1 KHAN Coin that could reward you tomorrow.

These days, 1 rupee is forgotten change — KHAN Coin is turning it into your chance at digital ownership with 1 KHAN Coin that belongs to you.

This pricing makes it easy for everyday people to become holders.

KHAN SAAB Coins will be sold in multiple price phases. Each phase will have a limited coin supply — once it's sold out, the price increases in the next phase.

KHAN Coin uses direct PKR pricing instead of confusing USD conversions — so the public knows exactly what they're getting:

1 PKR = 1 KHAN Coin

For international users, equivalent USD prices will also be shown at each sale phase.

Roadmap (Phased)

Phase Key Milestones

- 1 BSC Testnet Launch, Website, Whitepaper Finalization
- 2 BNB Mainnet Launch, Community Growth, Referral and Giveaway Campaigns
- 3 PancakeSwap Listing, Token Tracker, Utility Demo
- 4 Ethereum Bridge, Locked Reserve Unlock, Minor Governance
- 5 Utility Expansion, Real-use Apps, Long-term Sustainability

 Future Goal: KHAN SAAB Coin will develop its own decentralized app (DApp) and wallet to create a fully independent ecosystem.

 Social Media Transparency Plan
Weekly updates on Twitter/X
Telegram/Instagram community sessions
Wallet tracker and token lock proofs shared openly
Progress summary every 2 weeks

 Dynamic / Partial Lock Strategy
Example:
30% of tokens → 6 months full lock
30% tokens → gradual monthly unlock
40% tokens → soft lock (visible but flexible)
✓ Provides flexibility
✓ Builds public trust
✓ Reduces price crash risk

 Final Commitment
The total supply is clearly declared: 750 million
All locked and distributed tokens have purpose-based explanation
No misleading or hidden wallet labeling

Public sees only what is real and honest — no hype, just trust
KHAN SAAB Coin remains open to ethical partnerships and public development grants —
without compromising public-first values.
